

HANSEL AND GRETEL NATURE TRAIL

Hansel and Gretel love to go out exploring to see what they can find in the forest.

Next time you go outside (or maybe even from your window), see how many of these things you can spot. Tick the box for each thing that you see, and fill in the blanks too!

- A bird - how many different birds can you see? I could see birds!
- A bluebell
- Something scary, which was a
- A stone or pebble
- The biggest tree you can spot
- Something an animal might eat, which was.....
- A leaf
- Something you haven't seen outside before, which was.....
- Something red, which was a
- A rainbow

Happy Nature-Trailing!

You might also want to make a nature collage of different things you have collected from outside, such as leaves, twigs and petals.

Once you have collected these, you can stick them together on a piece of paper to create a collage!
